## Introduction

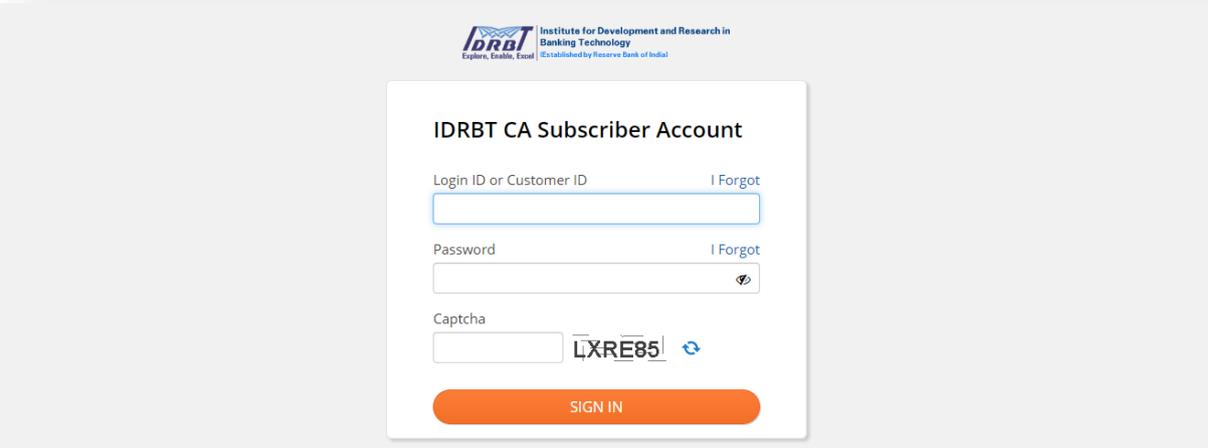

Subscriber has the privilege to login to their account and manage all their Certificates (or Setup Certificates), Download Certificates and Edit their Profile details.

### 1. Login

Subscriber Accounts are created by RA Admin or RA Operators during new certificate request generation process. Upon successful creation of account, a mail containing instruction to generate password for first time login will be sent to subscriber.

To login to Subscriber portal, open any browser like Chrome/Firefox/IE etc. and enter the respective IDRBT CA Subscriber Portal URL <https://10.0.67.57/idrbtsub> in address bar of the browser.

The following page will get displayed:

Enter "Login ID or Subscriber ID", "Password", "Captcha" and click on "SIGN IN" button. If the entered credentials are valid, Subscriber will be navigated to the Manage Certificate page.

### 2. Manage Certificate

Manage Certificate page contains the details of certificate applied, certificate ready for download and setup certificate (or fill application) of the subscriber.

- To fulfill certificate request generated by RA, the Subscriber needs to fill the application form (or Setup Certificate) and submit the same for RA Approval. This can be done by selecting the respective certificate request with status "Pending".

Manage Certificates						
Sl.No	Application ID / Date	Common Name / Validity	Certificate	Status	Expires	Action

- On click of "Setup" button, Subscriber will be navigated to Setup Certificate page where the details of the certificate will be displayed along with the provision to complete the Setup process.

Setup Certificate - Signature - Class 2 (Individual)		Share Link
+ 1. Requestor Details	Pending	<b>Request Details</b> Request Date 07-Dec-2019 (18:50:39) Application ID - Validity One Year Common Name Request Status Setup Pending
+ 2. Applicant Details	Pending	
+ 3. Validation Documents		
<input type="button" value="Save"/> <input type="button" value="Submit For Verification"/>		

- Request details like, Request Date, Application ID, Validity, Common Name and Request Status will be displayed at the right corner of the page.
- To Setup Certificate, the Subscriber needs to select and fill the respective details in the tabs available in the main page. On click of each tab, the same will expand to provide provision to enter details. Upon filling the details, "Proceed" button has to be clicked to make the status "Completed".

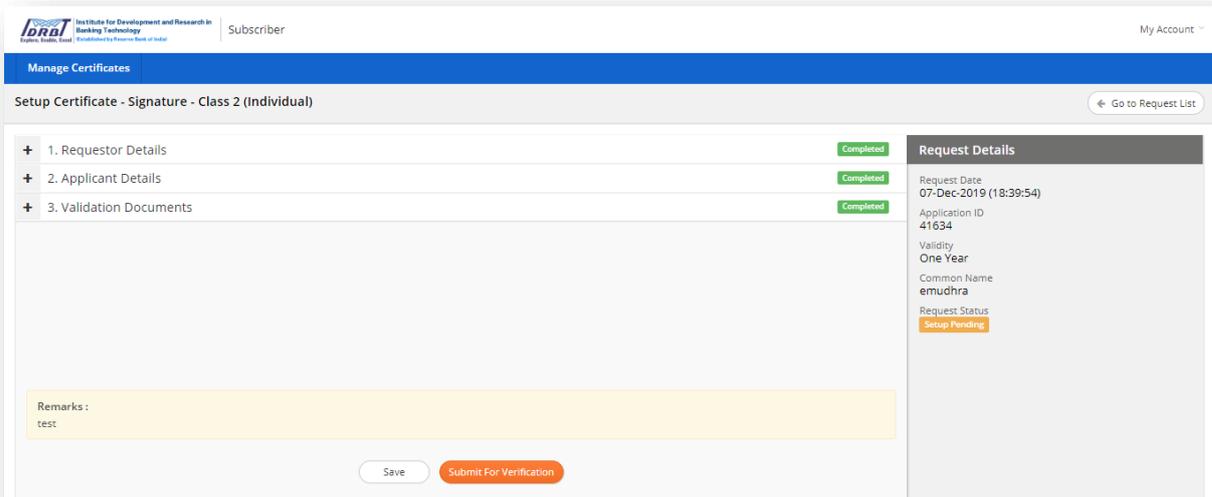

- Fields which are marked with asterisk (\*) are mandatory.
- Complete the verification process as mentioned in "Validation Documents" tab. The verification process will vary based on the Certificate Type which are pre-defined.
- Subscriber can edit the details at any point of time before Submitting for verification. Once the application is submitted by Subscriber, it can't be altered.
- The following are the different set of Verification Types and their Modes. This is defined based on Certificate Type by IDRBT Admin.

Verification Type	Mode	Description
Document List	Upload Document	Upload PDF document

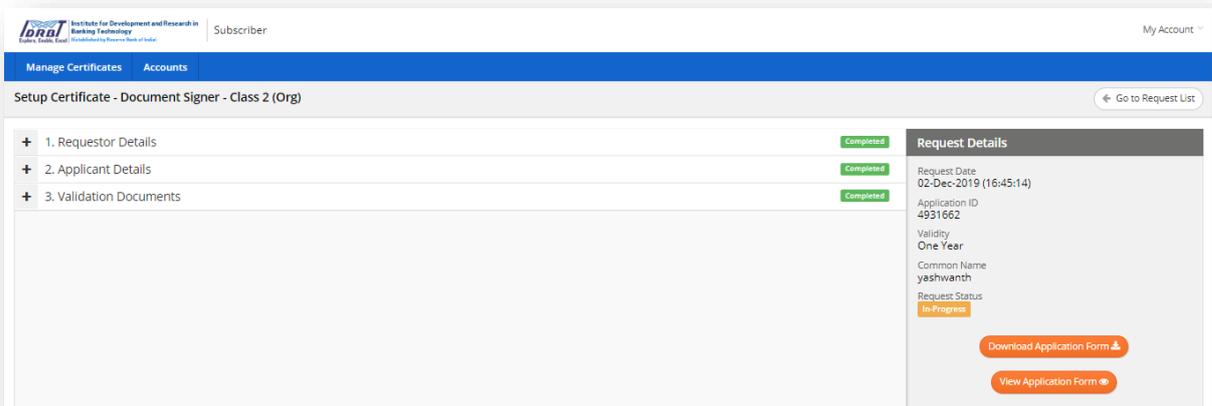

Domain Verification (SSL Certificates)	DNS Based	Respective CNAME record needs to be created in DNS Server.
	Email Based	An email with link to verify the ownership of the Domain will be sent to default email IDs of the domain or to the list obtained from Who is records. The Subscriber needs to click on the link received and verify the domain ownership.
	File Based	The respective record (text file) needs to be created in DNS Server.
Email Verification	Email Link	An email with a link to verify the ownership of email ID will be sent to Subscriber. The Subscriber needs to click on the link received to verify the same.
	Email OTP	Subscriber will receive an email with OTP, the same needs to be entered respective verification block of Setup Certificate page.
	Upload Document	Upload PDF respective document.
EV Verification (SSL Certificates)	Certificate Approve Authorization Letter	Upload PDF of Certificate Approve Authorization Letter.
	Contract Signer Authorization Letter	Upload PDF of Contract Signer Authorization Letter.
	Organization Operational existence Verification	Upload PDF of Organization Operational existence Verification proof.

	Organizational Physical existence Verification (Address)	Upload PDF of Organizational Physical existence Verification Document.
Hardware Key Storage	Upload Document	Upload PDF document.
Individual Verification	Upload Document	Upload PDF document.
Organization Verification	Upload Document	Upload PDF document.
Physical Verification	Upload Document	Upload PDF document.
	Video Recording	Video of the subscriber to be recorded through the link provided by answering the questions asked during video recording process.
Telephone Verification	Inbound SMS	Subscriber will receive an OTP. The same needs to be entered in respective section of Setup Certificate page to complete the mobile verification process.
	Outbound SMS	Subscriber will receive a message through SMS. The same needs to be forwarded to the mentioned number in the message to complete the verification process.
	Upload Document	Upload PDF document.

- On successful filling/completion of all verifications based on the certificate type, all tab status will change to "Completed" status and "Submit For Verification" button will get enabled.

- On click of “Submit For Verification” button, the respective certificate request will be submitted for Approval process and also an email will be sent to the Subscriber stating the same.

- After Successful processing of certificate request by RA and CA, an email containing the link to download certificate with “Application ID” and “Download PIN” will be sent to subscriber’s registered email ID.
- The Subscriber can download the certification either by clicking the link provided in the email or by logging into the Subscriber portal and by clicking on “Download” button available in Manage Certificate page.

- On click of "Download" button, will take to download certificate login page where the subscriber needs to enter the certificate request number/Application Number and Download PIN.

### Download Certificate

**Important Notice**

**Compatibility:**

- ✓ Before you proceed to download, please insert the USB token in which you want to download the certificate.
- ✓ Install the token drivers by clicking: [Click Here](#) (if drives not installed in your computer)
- ✓ Now proceed to enter the digital certificate application number and challenge code sent by us to your mobile number registered with us. (please see right side of this page)

**Important Note:**

**For Digital Signature certificates:**

Class 2 and Class 3 Digital Signature Certificates download is allowed in USB Crypto Token **only**

Do not close the browser or remove the token till the certificate is downloaded

**For Document Signer certificates:**

Please do not insert any USB Crypto Token in the computer during download

After download, the certificate will be available in the browser as per the path: Tools > Internet Options > Content > Certificates > Personal

Download Certificate

Application Number

Download PIN

Activate Windows

- On click of "Proceed" button in download certificate page, the entered credentials will be validated and redirected to certificate details page.

## Download Certificate

**Note:** Please remember the Password provided for the Certificate/Token. Once it is lost cannot be recovered.

### Certificate Details
